With a recent visit from the HR/IR department to the Gauteng Trolley Warehouse, we were met with bright-eyed and bushy-tailed operational managers, with positive vibes and enthusiastic faces. The Operations Division conduct weekly meetings with senior managers and their teams, to ensure that all planning for the upcoming week is discussed and any concerns are ironed out. This includes planning surrounding the large number of learners who are completing their registration documents for the upcoming W & R SETA learnerships, commencing at the end of November. Peak period brings with it much planning on recruitment, staffing and productivity, which is key to a successful festive season.

GPR Training Academy also celebrated Disability Rights Awareness month (Nov to Dec). Reasonable accommodation is always arranged for learners living with disabilities on site, such as SA Sign Language Interpreters, warning lights for fire alarms, buddy systems for evacuations, air ventilation systems etc. We wish the learners the best with their 12-month learnerships.

Be sure to visit any of the vaccination sites to get your job – according to the World Health Organisation it's your best chance to survive the serious symptoms of COVID-19.

Charis vd Merwe, Chief HR & Training Officer
